COMMUNITY-ENGAGED KNOWLEDGE TRANSLATION

- Previous social network analyses have used stakeholder consultations to share findings and generate feedback (Purington, 2020, & Costenbader, 2018).
- Overall goal is to ensure that stakeholders have an active role in interpreting findings and determining future directions for the Network
- This will be achieved through:
 - Consultation - July 28th
 - 2-page summary documents

KNOWLEDGE EXCHANGE

Consultation –
July 28th, 2021

EXAMPLE QUESTION & RESPONSES

Question 1 - Which of the findings presented stands out the most to you?
Please explain why.

**Possibility for
resource
sharing
between
member
organizations**

**Impact of
COVID-19**

**Potential for
increased
collaboration
across regions**

**Most
important
contributions
of other
members**

**Lack of
connections
between
certain
geographic
regions**

**The potential
for increased
cross-sectoral
connections**

Scarborough Hospital Sexual Assault/Domestic Violence Care Centre: trans-LINK Social Network Summary

trans-LINK Network Map

The map to your right represents collaborations among trans-LINK Network members from across the province.

Centrality of Your Organization in the Network

25.42% = Degree Centralization

High Degree Centrality

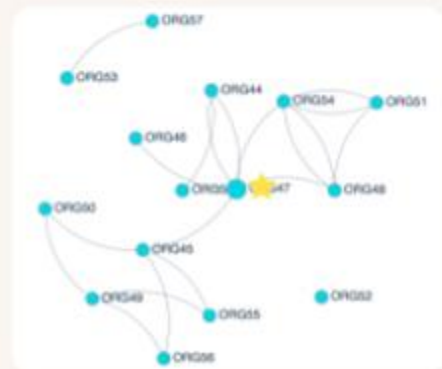

Your organization's degree of centralization in the network is high, meaning that you are connected to many organizations.

What does this mean?

Given your centrality, your organization may be a leader within the network and could potentially share information and resources with many other network members as well as foster collaboration amongst less connected network members.

Your regional collaborations

These are connections among your organization and others in your region.

2-PAGE SUMMARY TEMPLATE

How did your organization's responses compare to other organizations?

| Question | Your organization | In your region | In the province |
|--|-------------------|----------------|-----------------|
| Most important contribution to the Network | | | |
| Greatest challenge in collaborating with other Network organizations | | | |
| Most commonly listed benefit of participating in the Network | | | |

trans-LINK Network members & COVID-19

How did COVID-19 impact collaborations?

| In your region* | In the province* |
|-----------------|------------------|
| | |

*Most common response among available options

Were collaborations impacted by COVID-19?

*the trans-LINK Network is comprised of 130 member organizations, of these, the survey was sent to 119 organizations that provide direct-services. Of the 119, X participated in the survey. Thank you for participating in our survey! We look forward to ongoing collaboration with you and other network members.
