

Utilizing Social Network Analysis to Evaluate Intersectoral Collaboration in the Care of Trans Survivors of Sexual Assault

Madelaine Coelho, MA
University of Toronto, Department of
Sociology

Dr. Janice Du Mont, Supervisor
July 20 , 2021

trans-LINK Network: an intersectoral network bringing together community and healthcare organizations across Ontario to enhance supports for trans survivors of sexual assault.

**Using Social
Network Analysis to
Better Understand
the trans-LINK
Network**

**Program to Analyze,
Record, and Track
Networks to
Enhance
Relationships
(PARTNER)**

month

WHAT DOES THIS MEAN?

- ❖ We can **locate gaps** in communication, connectivity, and collaboration among Network members
- ❖ We now have an understanding of **the key players in the Network** (well-connected and influential organizations)
- ❖ We have a **baseline measurement** of our Network
- ❖ Findings can guide **strategic recommendations** to address identified gaps in the trans-LINK Network*

THANK YOU
